

CT-FDDM

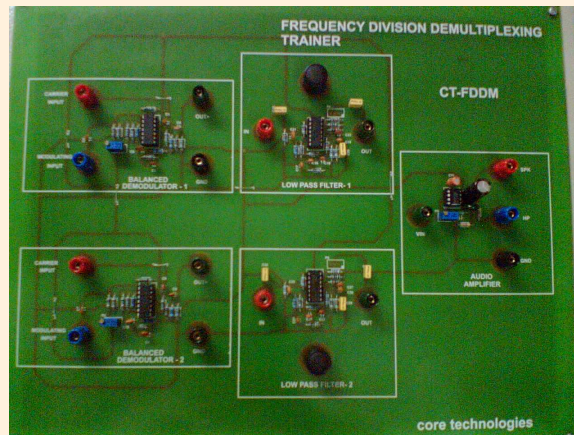

Frequency Division Demultiplexing Trainer

Salient Features:

Demonstration of Frequency Division
Demultiplexing of 2 channels

Specifications:

Input: 1 Nos. FDM signal
Output channels: 2 Nos. Analog Outputs
Frequency Demodulation: 2 channels
Band Pass Filters: 2 Nos.
Power Supply: In-built

List of Experiments:

Study of 2 channel Frequency Division
Demultiplexing
Study of Frequency Demodulation
